DETAILED ACTION

1. It is noted that the status identifier for claims 16-17 should be --previously presented--.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4-5, 7-8, 10, 12-13, and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson, Jr. (US 3,760,673).

Peterson discloses all the recited elements of the invention including:

- a) a rotatable blade having an edge which is non-linear radially (e.g., 18);
- b) a stationary counter-knife having an edge generally conforming to a profile of the blade edge (e.g., 30);
- c) a material support surface (e.g., at 35);
- d) the blade edge being located along an imaginary cylindrical surface formed by the rotation of the cutting edge so that the cutting edge of the rotating blade passes the cutting edge of the counter-knife in succession when rotating blade is turned (col. 3, lines 9-19).

Regarding claims 2 and 12, col. 3, lines 9-19. Regarding claims 4 and 7, a portion of the blade edge can first rotate past the counter-knife to cut a portion of the carpet pile adjacent a base of the carpet first and the blade edge has a portion capable

of cutting an edge of the carpet with an edge on the counter-knife having a profile conforming the portion of the blade edge. Regarding claim 13, the blade is shaped such that it is capable of cutting portions that are perpendicular and angled relative to the plane of the carpet base. Regarding claims 16-17, the element 30 is movable relative to the element 35 via 36.

Response to Arguments

4. Applicant's arguments filed March 28, 2008 have been fully considered but they are not persuasive.

Applicants contend that the Peterson reference does not teach or suggest a material support surface that is not co-planar with the counter-knife edge as claimed.

The examiner respectfully disagrees. The material is supported by the counter knife which is supported by the element 35. Hence, the surface on the element 35 indirectly supports the material and is not co-planar with the counter-knife edge as claimed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3724

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
